CAMDEN DOOR CONTROLS

Door Activation Devices

CM-45, CM-46 and CM-46CB Series Push Plate

INSTALLATION INSTRUCTIONS

ADA UL LISTED

CM-45   CM-46   CM-46CB

THIS PACKAGE INCLUDES:

(1) "All Active" Push Plate
(1) Parts kit

1. GENERAL DESCRIPTION

Camden Door Controls CM-45/46 Series all-active switches are heavy-duty,weather resistant ADA-compliant door controls. The 4 1/2" square faceplates are stainless steel or aluminum, and the assemblies are designed for easy installation. Both series mount to standard single gang or double gang electrical boxes. CM-45 series is sold as a complete assembly, which is mounted to the in-wall box (or surface box) using stainless steel Allen screws and a hex key (included with the switch). Access to the mounting screws is through small holes in the front of the faceplate. This provides for tamper resistance, while maintaining an attractive overall appearance. CM-46 series is sold as a two-part assembly. The rear assembly is mounted to the in-wall box (or surface box). The front faceplate is then screwed to the rear assembly using either standard or security screws (included with kit). The SPDT (and optional DPDT) switches are UL/CSA approved, and rated 15 amps @ 30 VDC. The push switches are offered with different graphics, and in various architectural finishes. Watertight configurations are also available

2. SPECIFICATIONS

Voltage	12/24V DC
Contact Type	SPDT FORM 'C
Switch Type	Momentary
Contact Rating	15A @ 30 VDC
Temp. Range	-40°F to 140°F (-40°C to 60°C)
Std. Finish	CM-45, CM-46: US32/630 CM-46CB: Blue Powder Coat
Dimensions	CM-45, CM-46 & CM-46CB SERIES: 4-½" H x 4-½"W x 1-⅜"D (114mm x 114mm x 34mm)

3. APPLICATION

Camden 'all-active' push plate switches are designed for areas where an easy-to activate, high-visibility switch is desired. Ideal for high-traffic areas, hospitals, wheelchair access, seniors' residences, etc. They can be surface or flush mounted.

Camden 'all-active' push plate switches are designed to control electric strikes, electromagnetic locks and automatic doors. They may also be used for shunting,bypassing alarms, request to exit, timed functions and many other applications.
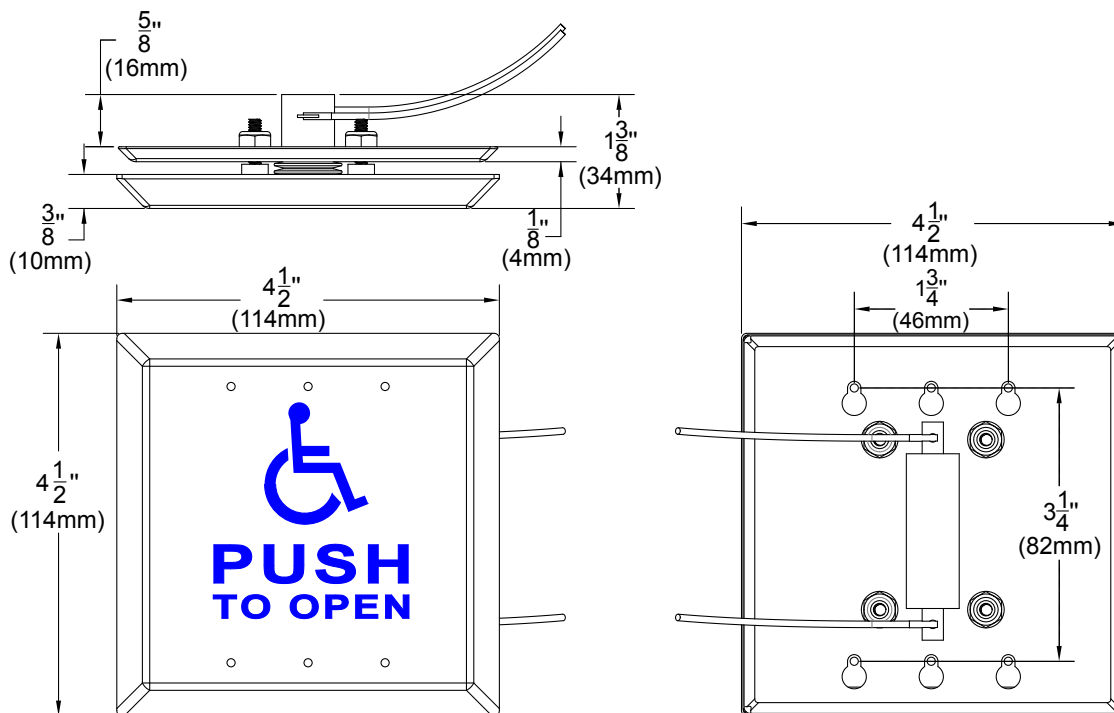

The switches are made for high frequency usage for both indoor and outdoor environments. Camden switches are versatile and can be supplied in various configurations and finishes to suit any commercial, industrial or institutional application.

5. INSTALLATION AND WIRING

For CM-45 Models

Mounting Options:
- The CM-45 can be installed using either flush or surface mounting methods.

Selecting a Surface Mount Enclosure:
- Refer to the "Parts and Information" section (Page 5) to choose a suitable Enclosure.

Installation Process:
- Use two #6-32 x 1 - ¼" screws for surface mounting and four #6-32 x 1 - ¼" screws for flush mounting

- Insert the screws into the designated mounting holes, but do not fully tighten them at this stage.
Attaching the Switch:
- Align the CM-45 so that the screw heads slide into the slots on the back of the switch.
- Once the CM-45 is in position, proceed to secure it in place.

Securing the Switch:
- Insert the hex key into the holes on the faceplate to access and tighten the screws.
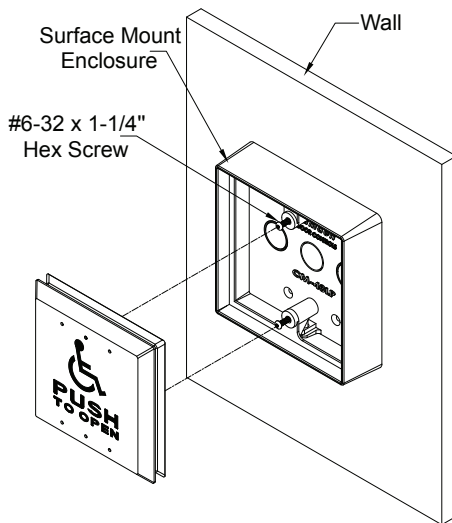

CM-45K Surface Mount

CM-45K Flush Mount

For CM-46/CM-46CB Models

Mounting Options:
- The CM-46 and CM-46CB offer flexible installation methods with options for either flush or surface mounting.

Selecting a Surface Mount Enclosure:
- Refer to the "Parts and Information" section (Page 5) to choose a suitable Enclosure.

Preparing for Installation:
- Begin by removing the #6-32 x 3/16" screws from the faceplate. These will be used later to reattach the faceplate after mounting the back plate.

Mounting the Back Plate:
- The back plate is mounted using #6-32 x 3/4" Phillips Screws.
- Position the back plate against the mounting surface or enclosure and secure it in place with the #6-32 x 3/4" Phillips Screws. Ensure these screws are tightened appropriately.

Reattaching the Faceplate:
- Once the back plate is securely mounted, align the faceplate with the back plate.
- Reattach the faceplate by inserting and tightening the #6-32 x 3/16" screws removed earlier.
