

The CX-DE1200 Piezo Buzzer is a remote sounder for the CX-DE1200 Delayed Egress Magnetic Lock.

The CX-DE1200 Piezo Buzzer connects to the terminal connections in the CX-DE1200 Delayed Egress Magnetic Lock PCB. The CX-DE1200 Piezo Buzzer can be installed as a sounder extension at any remote location inside or outside of the locked room.

CX-DE1200 Delayed Egress Lock

RED Rly – Alarm Output (The contact will change state when the alarm has been triggered by a person pressing on the door to exit during the countdown before the maglock is de-energized and released.)
