

CV-TACIP-100 SERIES

VISTADIAL™ VOIP COMMUNICATIONS SERVICE

FEATURES

VistaDial™ is a 3rd party VOIP (Voice Over Internet Protocol) telecommunication service provider, needed to support the operation of CV-TAC100 Integrated telephone entry and access control systems.

VistaDial™ provides an online telecommunications service, with an annual subscription agreement between VistaDial™ and the site facility owner or facility management company.

In addition to providing VOIP communications, the VistaDial™ service also supports installers with the installation, maintenance and trouble-shooting of the IP communications to CV-TAC100 panels, including call testing to confirm connectivity, sound character adjustment, and suggestions for improving quality of VOIP service.

VistaDial™ VOIP service does not include the Internet Service Provider (ISP) system address and building computer network services that are also required for CV-TACIP-100 panels to operate.

For information regarding pricing for VOIP communications services and recurring monthly revenue (RMR) to the installer, please contact the Camden customer service department.

For terms and conditions applicable to VistaDial™ VOIP service, please visit: <https://www.vistadial.com/termsofservice>
