

INSTALLER QUALIFICATION FORM

INTRODUCTION

This form is to be completed and returned to Camden Controls prior to the purchasing a Camden CV-TACIP system.

In completing the questions below, the installer acknowledges that Camden Controls is NOT able to provide installer support for general computer networking knowledge and skills. In all cases, Camden Technical Support begins when our technician is able to connect online with a CV-TACIP panel.

Installing Company: _____

Installing Technician: _____

Questions:

1. What is an:
 - a. IP address? _____
 - b. Subnet? _____
 - c. Domain? _____

2. Did you set up and manage your own IP network ___yes ___no
 If so, do did you use any wizards? _____

3. List networked products installed to date, including CCTV or Access Control Systems? List project location, manufacturer and system model number:

4. Are you currently certified by any manufacturer to install their IP system? List brand/system:

5. Have you installed a system or application utilizing voice over IP (VOIP)? Describe:

If you have answered negatively to the questions above, Camden Controls again cautions you that we may not be able to provide the technical support you may need to successfully install our IP based system.

For installation companies needing additional network training, Camden Controls can provide access to online network training courses, both free and at cost, upon request. Contact Camden Technical Support at 877 226-3369, EXT 251 for details.
