

CM-PT: Heavy Duty Power Transfer Cables

Features

- Surface and concealed models
- 1/4" ID. models for 4 conductor 22 gauge, or 2 conductor 18 guage wire
- 3/8" ID. models for 16 conductor 22 gauge, or 8 conductor 18 guage wire

| CONCEALED POWER TRANSFER CABLES                                                    |                                                                                      |

| CUSTOM LENGTH PROGRAM                                                                                                                                                                                                                                                                                                                                                                                |  |
| <p>The Power Transfer Cables can be ordered in custom lengths in inches. The models will be preceded by "CC" instead of "CM". Each power transfer cable category has a base number, followed by XX in inches. Pricing is based on a base price, plus a price per inch.</p> <p>For Example: CC-PT375SS-14 is a custom stainless steel power transfer cable, sized 3/8" inside diameter x 14" long</p> |  |
| CC-PT250SS-XX                                                                                                                                                                                                                                                                                                                                                                                        |  |
