

Door Activation Devices

CM-400 Series 1 5/8" Pushbutton, Stainless Steel Faceplate

INSTALLATION INSTRUCTIONS

THIS PACKAGE INCLUDES:

- 1 - 1-5/8" (40mm) diameter and free-spining, heavy-duty button
- 1 - Vandal resistant 18-gauge stainless steel faceplate
- 1 - Normally open and/or Normally closed, Contact block
- 1 - 6" Blue wire with spade connector
- 1 - 6" Grey wire with spade connector
- 2 - 6-32 x 3/4" FH PH Screws

CM-400

1. GENERAL DESCRIPTION

The CM-400 series comes in three different styles of faceplates (Single Gang, Double Gang and Mullion). Graphic Options can be added to either the faceplate or the button face. An assortment of mounting boxes is also available for each style.

2. SPECIFICATIONS

Voltage	12-24V AC/DC
Contact Rating	6A @ 30V AC/DC
Switch Type	Momentary & Maintained
Standard Finish	US32/C32D
Dimensions	<p>CM-400: 4 1/2"H x 2 3/4"W x 1 3/4"D (114mm x 70mm x 44mm)</p> <p>CM-400N: 4 1/2"H x 1 3/4"W x 1 3/4"D (114mm x 44mm x 44mm)</p> <p>CM-400W: 4 1/2" H x 4 1/2"W x 1 3/4" D (114mm x 114mm x 44mm)</p>

3. APPLICATION

The CM-400 Series is designed to control overhead doors, electric locks, electromagnetic locks, electric strikes and automatic doors. They may also be used for shunting, bypassing alarms, request to exit and many other applications.

They are made for high frequency usage, in an indoor or outdoor environment. Easily visible, they are available with narrow one gang or two gang stainless steel mounting plates.

4. INSTALLATION

The CM-400 series can be ordered with either a Normally Open or Normally Closed contact block. Each contact block is color coded. A contact block with a green actuator is Normally Open, while the red actuator is Normally Closed. Both types are available in a Momentary configuration.

The CM-400 series comes with one contact block but can easily have three attached across the back of the button. If the application calls for more than three functions to happen on activation, then each contact block can be stacked with another doubling the number of functions on activation.

Installation is very simple by inserting the wiring into the top and the bottom of the contact block and securing them with the two screw terminals.

Each contact block has its screw terminals numbered so that the provided diagrams can be followed with ease and clarity.

INSTALLATION INSTRUCTIONS

5. WIRING

Momentary: When the switch is pressed the current pole will change to the opposite state until released.

Maintained: When the switch is pressed it will provide the opposite pole until the button is pressed again.

6. OPTIONAL WIRING

Switches may be ordered with optional LED's. These drawings show the various wiring configurations of the LED's.

NOTE:
The 560Ω Resistor is integrated with the LED.
These LEDs are designed for DC Voltage only.
